The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, 29-38, drawn to a device and method for scheduling and communicating in a serial manner comprising transmitter resources, an output bus coupled to the transmitter resource, and an antenna summer, classified in class 455, subclass 561 (fig. 1a).
 - II. Claims 20-23, drawn to a configurable transmitter comprising a computer readable memory, a processor coupled to the memory and a configurable modulator coupled to the processor, classified in class 455, subclass 73 (fig. 2a).
 - III. Claims 24-28, drawn to a configurable modulator comprising a memory having shift register taps and a selective interconnect coupled to a part of the shift register taps, and an input line coupled to a multiplexer classified in class 375, subclass 130 (fig. 5f).
- 2. The inventions are distinct, each from the other because of the following reasons:
 Inventions I and II are related as combination and subcombination. Inventions in
 this relationship are distinct if it can be shown that (1) the combination as claimed does
 not require the particulars of the subcombination as claimed for patentability, and (2)
 that the subcombination has utility by itself or in other combinations (MPEP §

Application/Control Number: 09/922,484

Art Unit: 2685

806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the particular components of the transmitter resource is not required for claim 1. The subcombination has separate utility such as processing and storing for a particular transmitter resource.

Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the particular components within the modulator is not required for invention II. The subcombination has separate utility such as storing data values in register taps and receiving instructions that indicate which register tap is used for a particular modulation protocol.

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and search, restriction for examination purposes as indicated is proper.
- 4. A telephone call was made to Paul Fields on 11/26/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Application/Control Number: 09/922,484

Art Unit: 2685

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lana N Le whose telephone number is (703) 308-5836. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward F Urban can be reached on (703) 305-4385. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Business Center (EBC) at 866-217-9197 (toll-free).

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
